

THE WIZARD

Quotations from the Yachting Press

- "It's a great looking boat and very exciting"
- "The jib is self tacking and can therefore be left to its own devices once set for the point of sailing"
- "The workmanship on the hull was exceptionally good, and the layout of the controls well thought out"
- "The Wizard is exciting to sail and more stable than we expected"
- "The Wizard planes fast given a reasonable breeze, and is not unduly difficult to sail"
- "I started trying to control the mainsail with the main sheet, but soon learnt that it was much easier to use the traveller"
- "The Wizard appears an extremely speedy machine and may be the fastest monohull (Single-handed dinghy)"
- "The Wizard will almost certainly be very fast"
- "It is certainly at its fastest on a reach when it will more than live up to a Portsmouth Secondary Yardstick of 104"
- "Its virtues and vices tend to run in marked contrast to its nearest rival, the Contender" (a single sail boat)
- "The Wizard was working magic with approaching visitors"
- "This 17'5" sliding seat single-hander, looks very low and mean"
- "Probably more stable than the International Canoe, possibly more exciting than a Contender"
- "Most single-handers will think of a 'plank' as being simpler than a 'wire'"
- "She should be a lot of fun"

And from the Designer:-

"A single sail boat can never have the thoroughbred feel of two sails, nor the interest or performance. At last, to fill this total void for those fast boat dinghy sailors who wish to be, or are of necessity, single-handed, there is the exciting but sensible and practical answer:-
